It is with great enthusiasm that I write about my experiences with MLS Cutting Edge Cold Laser therapy. We purchased this technology quite recently, so we're novices at it right now, but our clinical outcomes with it have been most impressive thus far.

Even though COVID-19 has put its ugly face in our business, we still have reached a lot of needy people. Treatments were rendered primarily on our toughest, most stubborn cases. Conditions treated include low back pain, neck pain, shoulder, wrist, and knee pain, edema {severe}, absence of wound healing, sciatica, and TMJ, to name but a few.

The results were astonishing! Nearly all of our patients reported substantial improvement symptomatically, with most cases resolving completely. And our chiropractic adjustments when utilizing the MLS technology are superior as well. Adjustments hold MUCH better than before, almost universally. Many are so impressed that they've signed up for a maintenance program with MLS Cutting Edge.

Again, despite the fact that we've only been utilizing this technology for a short period of time, and the added complication of the pandemic, we're closing in on \$10,000 collected thus far, all in cash.

I cannot think of another piece of equipment that has made such a dramatic impact on my practice. To have the ultimate "ace in the hole" that we didn't have prior to getting this into my practice has given all of us a swagger and a confidence that we never had before.

Should you wish to contact me personally about the transformation my practice has enjoyed because of this technology, please don't hesitate to call me. I may also be reached at drjerrydc@gmail.com.

Yours in great health,
